

# EXPO

FOR YOUNG SCIENTISTS  
Est. 1980

## Inspiring Young Scientists and Researchers

The Eskom Expo for Young Scientists (EEYS) is an exposition where students have a chance to showcase their investigative projects. Learners get to discuss their work with judges, teachers and students from other schools, with parents and with other interested people.

It is a resilient science foundation that has been built over the years by dedicated and highly skilled individuals who have ensured that our learners are moving in the direction of science education (STEM). We seek to engage young people in high-quality scientific research!

### JOIN US

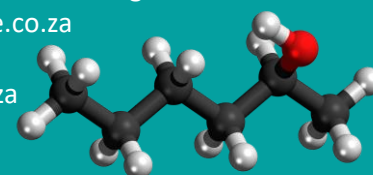

Are you INNOVATIVE? Creative? And curious about science?

Be one of the 100 000 learners that we reach across 35 regions in SA. Take part in the regional expos and stand a chance of winning amazing prizes and being selected to participate in the International Science Fair (ISF).

*Prizes include:*

- Bursaries worth over R14 million
- International Tours
- Amazing prizes for your schools
- Large cash prizes

## Pro Tips for an awesome project!

Our Educational Series provides tips on how to do an award-winning project! This can be found on our website and social media pages.

## Did You Know?

Many countries in Africa are producing fewer inventions today than they did in the early 1990s, despite healthy rates of economic growth

*(UNESCO Science Report 2015)*

Eskom Expo for Young Scientists is the catalyst for redressing the imminent shortage of scientific inventive skills crisis the country faces.

## What are the benefits?

1. Learners with innovative and original projects have the chance of being selected to represent South Africa at International Science Fairs.
2. Explore your scientific career from one of the 13 categories
3. Many past winners have furthered their careers in science based on the projects they submitted to the Eskom Expo for Young Scientists.
4. Win fantastic prizes for your school and yourself.

“Every time I come to the Eskom Expo my belief in South Africa is strengthened ten times over. At the Eskom Expo, we want to begin the process of identifying talent. If we pique learners’ interest at a young age, it is possible to sustain it for many decades to come.”

Minister of Science & Technology, Naledi Pandor.

## HOW TO ENTER

1. Choose a topic
2. Identify a category out of 13 categories (see our website)
3. Get approval from your teacher
4. Conduct the research
5. Select closest region; register your school and project (see website)
6. Enjoy your experience!

**Should you need assistance with entering, contact your Provincial Coordinator or the National Office**
